**United States Air Force (USAF)**

**AFPD36-30.** The Air Force Duty Status Program (DSP) exists to enhance total force accountability and improve crisis responsiveness. It is a process which allows for the maintenance of a centralized database, accessible to all levels of command depicting the current status of the force. It is designed to provide commanders, planners, and managers strength-affecting information. It encompasses all events causing a person to be not present for duty. The DSP is the conduit for data impacting Air Force Personnel Tempo (PERSTEMPO) and the payment of high-deployment pay (Burdensome Tempo).

**Objective**. The objective of the DSP is to capture and report all changes in an individual's duty status condition and to ensure changes are reported immediately, regardless of the length of the change. Specifically, the DSP provides a mechanism for Commander's Support Staff (CSS) and Military Personnel Flight (MPF) personnel to update data in the Personnel Data System (PDS), either through Personnel Concept 111 (PC-111) or the Base Level Personnel System (BLPS). This data can be used in making force management decisions.

## *IMPORTANT MESSAGE*

**AF Form 1846 -** Effective 5 March 2001, AFDPO will implement new procedures and update the existing ones for processing the AF form 1846, Request for and Record of Organizational Account. This initiative is to continue the effort of developing and improving the process of ordering controlled products (accountable, safeguard, classified, and FOUO).

We will begin this initiative by verifying the approving official's signature against the name provided by the MAJCOM publishing manager. If the signature on the AF form 1846 is not the same as the one provided by the MAJCOM, that AF 1846 will be disapproved. In addition, if a contractor facility has a need for controlled items, the Administrative Contracting officer in lieu of a publishing manager MUST sign the AF 1846 form.

The AF form 1846 is used to establish an organizational account for controlled items. Therefore, all AF 1846 forms submitted MUST contain organizational e-mail addresses. Those AF 1846 request received without organizational e-mail addresses (such as personal e-mail addresses) will be disapproved.

When submitting revised AF 1846s, please include your organizational account number on the form. If this number is not on the form, it will delay processing your request. Revised AF 1846 request will be processed in 5 working days. The word "Revised" must be placed in the "Remarks" section of the form.

The final step of this improvement process will be to scrub the existing 1846 organizational accounts. Beginning 5 March, AFDPO/PPL will begin scrubbing all existing 1846 accounts; checking for duplicity as well those organizations having numerous accounts. If duplicates are found, the accounts will be deleted and the customer notified. Customers with existing accounts that have personal e-mail addresses on their accounts will have to resubmit a revised AF form 1846. The organizational account number and organizational e-mail address **must** be on this revised form.

If you have any other questions or concerns please contact Debbie Hall on DSN 754-2439 or Ora Lawler, DSN 754-2361.

**Indexes** were obsoleted in Oct 99 when the Master Catalog in the Electronic Transaction System was implemented. We left them up as a reference tool because they had much needed obsolete information in them. We were able, several months ago, to update the Obsolete Forms and Publications tables available on the e-Publishing site with sufficient enough obsolete pubs/forms data from the AFIND2 and the AFIND9 to remove those particular indexes from the site.

You can now use either the master catalog or the search engine on the e-Publishing Web site to generate listings of items available for downloading or ordering
