

## Converting Version 2.2 IMTs to Version 2.3

In order to take advantage of new features like rich text format (RTF), version 2.2 IMTs must be converted to version 2.3.

1. Start Designer 2.3 and then open an existing version 2.2 IMT.

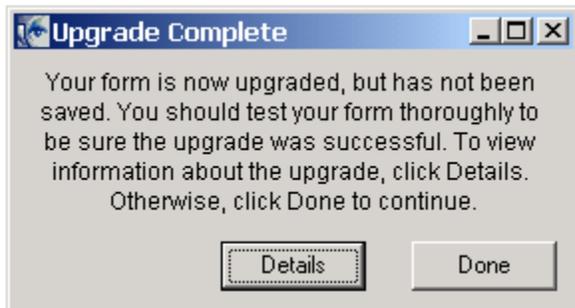

**Note:** The references to 5.1.0 and 6.0.0 are for versions of the Viewer associated with each Designer version.

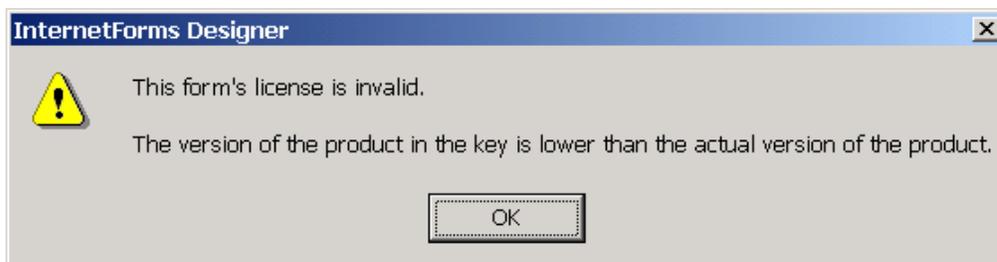

2. Choose **Yes**.

3. Click **Yes** to save an older version with a different name, [original name]\_510.xfd.

4. Click **Done** to continue.

**Note:** If the message above appears, click **OK** and continue. The IMT file is then opened and assigned the original file name. Save this new version.
