

Creating a Single Digital Signature

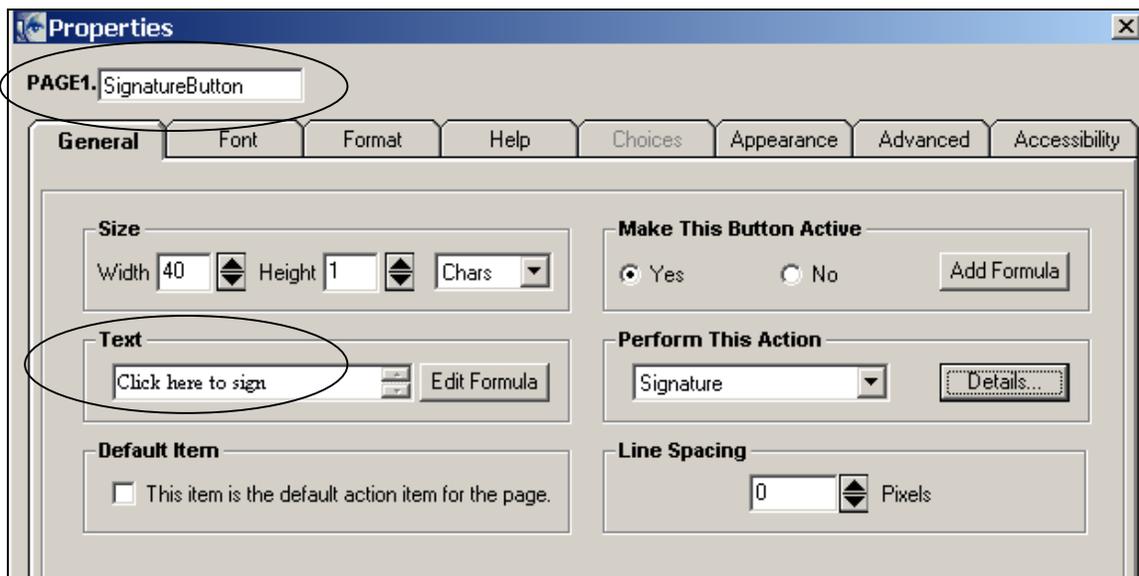

The following steps are for creating a single digital signature button that signs the entire IMT. You will need to first download a copy of *Signature Button object.xfb* found in the ICS Designer Objects section on the www.e-Publishing.af.mil website.

From Designer 2.3:

1. Choose **Tools...Import Object**
2. Navigate to the folder containing **Signature Button object.xfb**
3. Select the signature button object file and then click **Open**
4. Click in the desired area to place the signature button
5. Double click the signature button
6. Click the **Details** button to check the Action Settings for the button

7. Click **OK**
8. Double click in the **Page** text box
9. Type a name in the Page text box
Note: Names must start with a letter and can contain A to Z, a to z, 0-9, and the underscore (_). No spaces are allowed, ex., *SignatureButton*
10. Click in the **Text** edit box

11. Type the text that will appear on the face of the button
Example: *Click here to sign*
12. Click **OK**
13. Save your work
14. Preview and test the signature button in Viewer
