**This document is substantially revised and must be completely reviewed.**

27.17.1.4. The 354th Logistics Readiness Squadron (LRS) commander declines the option to require any other part number loads.

27.28. The Base Customer Service Center (BCSC) will accept non-cataloged requirements with a valid part number, technical order, figure, and index. These requirements will be requisitioned to the appropriate source of supply. All other non-cataloged requirements (except local manufacture) must be submitted to the Contracting Office on an AF Form 9 or purchased with the Government Purchase Card. Standard Procurement System descriptions will not be maintained by BCSC or loaded in the Standard Base Supply System.

27.31.1.4. The LRS commander declines the option to use the DD Form 1348-1A (single line item issue or due-out release). The DD Form 1348-6 (single line item requisition) will be used to request Air Force Material Command managed items.

27.31.1.5. Eielson does not possess an automated research capability. This LRS commander option is not applicable.

27.32.2. The LRS commander declines the option to maintain an automated record system for DD Form 1348-6 property requests. A master file of DD Form 1348-6 (hard copy) will be maintained.

27.36.1. The LRS commander declines the option to require annual technical order reconciliation between the BCSC and Operations. No technical orders are maintained by the BCSC.

27.42.3.1. The use of Automated Stock Number User Directory precludes maintaining a printed copy of the Stock Number Users Directory Listing (M14).

27.106.1.1. (Added) Eielson AFB query language processor program “Z20” (Freeze Code List) will be processed to select item records with a freeze code.
