This supplement implements and extends guidance of Air Force Manual (AFMAN) 23-110V2PT13CH9, *Special Purpose Recoverable Authorized Maintenance (SPRAM)*. This supplement describes 45 SW procedures for use in conjunction with the basic AFMAN. It applies to all 45 SW activities, tenants and contractors operated or supported by the USAF Standard Base Supply System. This supplement does apply to Air Force Reserve Command and Air National Guard units.

9.4.3.2.1. Letters of appointment will be submitted to Base Supply Equipment Management Element.

9.4.4.9.1. (Added) All SPRAM assets that are in SPRAM flag "Z" (other assets) must be re-justified under one of the remaining categories A-S or turned in. This includes both ERRC XD and XF3 assets. Re-justification must be submitted on an AF Form 601, *Equipment Action Request*, to Base Supply Equipment Management for submission through MAJCOM channels.

9.4.4.10.1. (Added) Initial requests for new authorizations or increase/decrease in quantity authorizations require submission of AF Form 601.

9.4.4.10.2. (Added) Approved initial requests and increased authorization documentation (AF Forms 601) will be maintained in the SPRAM custodian folder. Supply will not increase authorization until the asset is received and picked up on the SPRAM account. At that time, the necessary information must be provided to complete the processing (for example: organization, shop code, SRD, copy of approved AF Forms 601).
