---

This Instruction implements Air Force Policy Directive (AFPD) 21-1, *Air and Space Maintenance*. It establishes effective intercommunication within the 926th Fighter Wing (FW) Maintenance Squadron (MXS) and Aircraft Maintenance Squadron (AMXS). It applies to all 926 FW personnel.

**1. Responsibility.** All MXS and AMX supervisors/users must strictly adhere to this instruction. Priority use of the voice communication network rests with Maintenance Operations Center (MOC).

**2. Procedures:**

2.1. Radio Net. Proper communication discipline is maintained at all times, for example: Use of call signs for identification, courtesy when others are transmitting, avoidance of the use of profane language and transmissions limited to maintenance matters only. See *Land Mobile Radio (LMR) Handbook*, 1 May 1994.

2.1.1. Net 1. Used for maintenance status reporting, communications within the MX/AMX, back-shop support and request for parts (quick reference list only). Order parts for the AMX through Maintenance Supply Support.

2.1.2. Net 2. Fuel distribution (POL) and munitions delivery.

2.1.3. Coordinate LMR Maintenance through 926th Communications Flight (CF/SC) via the custodian of the account, as applicable.

2.1.4. Utilize security precautions when transmitting mission essential information.

2.1.5. Maintenance Communication Net, see **Attachment 1**.

**2.2. Direct Communications Lines:**

2.2.1. Use the hot line, red telephone located in MOC, for reporting emergencies/fires relating to the Naval Air Station (NAS) Joint Reserve Base (JRB) Fire Department.

### 2.3. Communications Outage:

2.3.1. Telephone outage only. Distribute LMRs, as required, to ensure work flow is not interrupted.

2.3.2. Intercom outage only. Utilize the telephone to the maximum extent possible, with LMRs being used as a back-up.

2.3.3. Complete loss of communications. If by some remote chance all power/communication is lost, relocate MOC personnel to Command Post.

2.3.4. If conditions warrant, runners are furnished by the AMX Squadron and Maintenance Squadron.

2.3.4.1. Available vehicles are utilized by the runners as much as possible.

RANDALL G. FALCON, Colonel, USAFR  
Commander
