DSA REGULATION
NO. 4140.42

6 May 70

USE OF DEFENSE SUPPLY AGENCY TEXTILES BY ALL DoD PROCUREMENT AGENCIES

I. PURPOSE AND SCOPE. To prescribe policy and responsibilities for effecting maximum use of long supply textiles in Federal Supply Group (FSG) 83 assigned to DSA for integrated management which can be used in Defense contracts, and to implement DoD Instruction 4140.23. This regulation is applicable to HQ DSA, Defense Supply Centers (DSCs), and the Military Services, and covers all procurement of end items using textiles in FSG 83. It has been coordinated with and concurred in by the Military Services. This regulation does not apply to:

- A. Contracts for which the total requirements for one of these materials procured as a part of an item is less than \$1,000.
- B. Contracts for parachutes and safety-of-flight end items.
- C. Textile materials for general use, repair, maintenance or modification of personnel safety items.
- D. Cloth used in the manufacture of propellant charges.
- E. Emergency purchases made under public exigency provisions of the Armed Services Procurement Regulation (ASPR).

II. POLICY. To the extent possible, the Military Services and DSCs with purchase responsibility will use textile materials which can be furnished by Defense Personnel Support Center (DPSC) from onhand inventories in long supply as mandatory Government Furnished Property (GFP) in the production of end items containing such materials. *

III. RESPONSIBILITIES

A. The Commander, Defense Personnel Support Center will: *

1. Furnish appropriate activities sponsoring procurement of end items a list of textiles available in long supply inventories, by 1 March, 1 June, 1 September and 1 December each year, for consideration for use as prescribed in the above stated policy. This listing will include:

a. Any textile material potentially suitable for use by contracting activities, available from long supply stocks in a contractually useful quantity which is of significant dollar value.

b. Identification of items for which items onhand in long supply may be substituted. Include nomenclature, Federal Stock Number (FSN) and specification.

2. Issue special notices (without waiting for the next quarterly listing) to advise using activities of a textile item(s) that is determined to be in long supply but is not contained in the latest listing.

This DSAR supersedes DSAR 4140.42/AR 32-7/AFR 67-149, 20 Apr 65, and change 1.

* Denotes changes.

3. When queried by Military Service activities or other DSCs for current availability of quantities needed from the latest DPSC list, furnish the following information for each item:

- a. Quantity.
- b. Condition Code.
- c. Anticipated remaining shelf life.

4. When requested by Military Service activities or other DSCs, reserve quantities requested for 45 days and supply such material when requisitioned.

5. Maintain close coordination with Military Service using and purchasing activities in order to promote the use of textiles in long supply whenever feasible.

* B. The Military Services and DSCs other than DPSC will:

1. Upon determination that items on the most recent DPSC list (or off cycle addition) can be used as mandatory GFP in contracts for end items, ask DPSC for current availability of quantities needed.

2. Upon determination that required quantities are available and can be used, ask DPSC to reserve such stocks for 45 days, during which time funded requisitions will be submitted for shipment to the contractor facility or for transfer of ownership. It will be the responsibility of the activity sponsoring procurement of the end item (requiring activity) to determine if items identified as onhand in long supply will provide the characteristics considered acceptable to the functions of the end item.

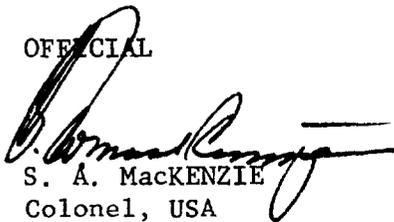

* C. The Chief, Supply Management Division, Executive Directorate, Supply Operations, HQ DSA is responsible for:

1. Monitoring this program.
2. Maintaining this regulation in a current status and reviewing it annually.
