Supersedes AFRCMD 1120, 28 August 1997

Pages: 4
Distribution: F

This mission directive prescribes the mission and establishes the responsibilities for Air Force Reserve Command (AFRC) aeromedical evacuation squadrons (AES).

SUMMARY OF REVISIONS

This revision rephrases peacetime mission (paragraph **1.1.**), and adds AES organization chart (**Attachment 2**). A bar (|) indicates revision from the previous edition.

1. Mission:

1.1. **Peacetime.** The mission of the AES is to provide training in aeromedical evacuation operations to support the full spectrum of potential scenarios, including but not limited to, humanitarian and disaster relief operations, small-scale contingencies (SSC), major theater war (MTW), and military support to civilian authorities (MSCA).

1.2. **Wartime/Emergencies.** Governed by Air Mobility Command (AMC) directive.

2. Command. AMC gained AES are assigned to AFRC operations groups. Their peacetime structure design maintains effective operations with the least expenditure of resources and minimizes organizational turbulence upon wartime mobilization. AES functionally align for structural compatibility with their active duty counterparts.

3. Assigned Forces. While in peacetime status, and during 2 weeks of annual training, the AES is under the direct control and supervision of the operations group to which assigned. Under Presidential call up, pursuant to Title 10 U.S.C. 12304, administrative jurisdiction remains unchanged. Operational control transfers to the commander of the gaining command. Under mobilization authority, command jurisdiction transfers to the commander of the unit to which assigned by the gaining command.

4. Relationship to Other Units. Established command channels apply. Communicate directly with the active duty lead command and respective Director of Operations Branches for AES on matters relating to training, inspection, and safety.

JAMES E. SHERRARD III, Lt General, USAF
Commander
