This supplement implements and extends guidance of Air Force Manual (AFMAN) 23-110V2PT2CH26, **War Reserve Materiel**. This supplement describes AFSPC's procedures for use in conjunction with the basic AFMAN. It applies to all AFSPC activities operated or supported by the USAF Standard Base Supply System (SBSS). This supplement does not apply to Air Force Reserve Command and Air National Guard units.

### **SUMMARY OF REVISIONS**

Corrects paragraph numbering. Adds paragraphs 26.26.2. through 26.47.5.5.

26.5.1. (Added) Submit recommended additions, deletions and changes to the MRSP/IRSP to HQ AFSPC/LCRPW, with information copy to the applicable wing. AFMAN23-110VIPT1CH14, **Readiness Spares Packages (RSP) and High Priority Mission Support Kits (HPMSK)** outlines procedures to be used when submitting changes.

26.8.2. This option is delegated to the Supply Manager.

26.8.2.1. Local programs may be developed for this review.

26.8.3.1. (Added) Screening WRM Details for Internal Changes. The War Readiness Element screens the Daily Document Register (D04) for internal changes affecting WRM details (i.e., TRICs FCU, FIC, etc.).

26.9.1. The Supply Manager has the option to assign functional check responsibility for WRM assets to either the War Readiness Element or the Inspection Element.

26.9.2. Local programs may be developed for this review.

26.17.2. Maintain MAJCOM IRSP listings in the War Readiness Element until superseded by a new list.

26.26.2. All deployments of AFSPC MRSP's are to be processed with asset accountability remaining at the home base unless otherwise directed by HQ AFSPC/LCRPW.

26.44.1. Any reference to AFI23-226, **Chemical Warfare Defense Equipment (CWDE) Consolidated Mobility Bag Management** no longer applies. Type A-1 bag can be used to increase rapid deployment capability. It consists of individual protective equipment (IPE) from the A bag and as a minimum will include a kevlar helmet, web belt, canteen (with cup, cover and M1 cap), ammo pouch and waterproof bag. Units requiring additional nonstandard items in the A-1 bag are also responsible for the storage, maintenance and funding of those items as organizational equipment.

**NOTE:** Installation Commanders may require that additional wing personnel be issued IPE for local exercise requirements. These items will be considered organizational equipment and will not be tracked in MICAS as A-1 bags.

26.44.3.1. Tariff sizing is the AFSPC standard. When tariff sizing is used recommend units ensure they collect sizing data from all individuals postured to deploy. This will allow units to adjust the tariff-sizing numbers to meet mission requirements. Any deviation from using the standard tariff must first be justified and then approved by HQ AFSPC/LCRPS.

26.45.1. Base Supply is responsible for storing and managing the safety level for A/B/C-1 bag assets.

26.45.2. The Supply Manager will establish a schedule to have all bulk items C-1 bags inventoried and MICAS data validated NLT 1 September in preparation of annual congressional reporting.

26.45.3. All A/A-1/B/C-1 mobility bag items and bulk stored mobility bag assets must be accounted for in MICAS. The most current version of MICAS will be used. Units storing their own bags will provide a monthly mobility bag status report to Base Supply Mobility Section for tracking and accounting in MICAS. Excess mobility bag assets will be identified to HQ AFSPC/LCRPS for possible redistribution within the command.

**NOTE:** Training assets are a unit responsibility and will not be tracked in MICAS.

26.45.3.1. (Added) B-Bags can be issued to individuals assigned to Northern Tier locations. Recommend MICAS be used to track B-Bag items. The requirement to meet B-Bag authorizations and the capability to report and show inventory levels available/on hand to HQ AFSPC/LCRPS still exist even if MICAS is not used to track these items.

26.46.1. The AEF TPFDD library is the source to determine mobility bag requirements. All A/DW\_ coded positions will get an A/B/C-1 bag. All A/DX\_ coded positions will get a gas mask only and will share equipment/supplies with A/DW\_ authorizations. Mobility bag authorizations provided by the Logistics Plans Office will be reviewed and updated annually NLT 30 Oct. As a minimum, the Logistics Plans Office will provide, in letter format, a break out of authorizations by host and tenant unit.

26.46.1.3. Gas mask authorization is one per A/DW\_ and A/DX\_ coded positions in the AEF TPFDD library plus 5% safety level. Issue of gas masks to individuals in coded positions is required due to the quantitative fit test requirement.

26.46.4. Unit commanders shall be responsible for replacing mobility bag assets that are lost, damaged or destroyed by unit personnel during deployments, exercises or training. Unit commanders will also ensure that mobility bags are returned to Base Supply in a timely manner after deployments, exercises or training. Assets shall be returned to Base Supply prior to release of personnel for leave or PCS.

26.47.2. Quarterly reports will be provided NLT the 10<sup>th</sup> day of the first month in each quarter. The Mobility Bag Element is responsible for providing sorts data to wing command post on C-1 bags stored in base supply.

26.47.3. Funding for active duty Air Force (Host/Tenant) C-1 bag assets will come from HQ AFSPC/CEX. The Base Supply Mobility Element is authorized to maintain reasonable supplies to reconstitute items consumed during AEF deployments (i.e. hoods, canisters and gloves). Mobility bag assets will be ordered using Urgency Justification Code (UJC), AZ.

**NOTE:** The guidance in AFI23-226, will not be used by AFSPC for requisitioning C-1 Bag assets.

26.47.5.5. (Added) Shelf life data is maintained in the MICAS web site and requires units perform monthly updates. <https://www.afmc-mil.wpafb.af.mil/HQ-AFMC/LG/LSO/LOA/apple/micas/index.htm>.
