This checklist reflects Command requirements for Civil Engineer Fire Protection units to prepare for and conduct internal reviews.

### ***SUMMARY OF REVISIONS***

This checklist has been revised to update checklist requirements. References for pre-incident plans and Uniform Facilities Criteria were added. An Asterisk (\*) indicates a revision from the previous edition.

1. References have been provided for each critical item. Critical items have been kept to a minimum and are related to public law, safety, security, fiscal responsibility and/or mission accomplishment. While compliance with non-critical items is not rated, these items help gauge the effectiveness/efficiency of the function.
2. This publication establishes a baseline checklist. The checklist will also be used by the Command IG during applicable assessments. Use the attached checklist as a guide only. AFSPC checklists will not be supplemented. Units produce their own stand-alone checklists as needed to ensure an effective and thorough review of the unit program. Units are encouraged to contact the Command Functional OPR of this Checklist to recommend additions and changes deemed necessary. See Attachment 1.
