OPR: HQ AMC/A47PS (Mr. Nick Everett)
Supersedes AFMAN 23-110, V2, PT2, CH 21,
AMCS6, 10 November 1999

Certified by: HQ AMC/A47P (Ms. Carol Ferk)
Pages: 11
Distribution: F

AFM 23-110, Volume 2, Part 2, Chapter 21, is supplemented as follows: (This supplement does not apply to Air National Guard or Air Force Reserve Command units.)

SUMMARY OF REVISIONS

Aligned paragraphs with basic manual. Updated all references of HQ AMC/LGSPS to HQ AMC/A47PS, and HQ AMC/LGSP to HQ AMC/A47P. Updated MAJCOM unique program table. **A bar (|) indicates a revision from the previous edition.**

21.131.1. (Added) The COBOL programs below serve only as an index to active AMC unique programs. HQ AMC/A47PS periodically sends a complete automated index to update program currency. HQ AMC/A47PS will mail, FTP, E-mail, or DDN run instructions to the base. File run instructions in the applicable program jacket folder. See the run instructions and AMC program index for exact frequency and applicability.

21.131.1.1. (Added) Unique Program Index.

Number	Notes	Program Title—Purpose	Frequency
GVL01		Scan DI/Status Details Load IEX. Program will create FCD to assign IEX to an item record when F77 has provided a current or previous status of "BN" for a Due-in and the item record source of supply is not F77. It will create a FCD to delete the issue exception code when the item record source of supply changes to F77.	Daily
GVL02		TWR-IRSP-ASL Build. Scans the item detail area and builds a 1F3L to load an ASL for IRSP detail record (SBSS 240 Detail Record)	Annually or after IRSP reconciliations
GVL03		DLR DIFM Status Report Budget Code 8 DIFM Report. Provides management with snapshot picture of dollars tied up in DIFM where budget code is an 8 and the major command code is 1L	Monthly
GVL04		Items Requiring Special Warehousing. Identifies items stocked within base supply that require special warehousing.	As Required
GVL05		Daily Transaction Scan. AMC Transaction History Scan. Lets the funds manager validate and control 3080 (BC Z) appropriations	As Required
GVL06		AMC Command RSP Inquiry. Provides the capability to collect Supply information on command MRSP/IRSP/HPMSK.	Daily
GVL07		AMC Command Inquiry. Program gathers data from AMC Supply Accounts	Monthly
GVL08	3	AMC Command Inquiry (Collector). Program merges, computes, and summarizes data collected from the L07	Monthly Sys Des option, all others as required
GVL09		Total Wartime Requirement Offset. Identifies and marks item records identified in the IRSP lookup table for priority stock replenishment.	Monthly
GVL10		Price File Compare. Consolidates the output from GVL07 price file output. Builds consolidated price file and SNUD mismatch file.	As Required

Number	Notes	Program Title—Purpose	Frequency
GVL11		Boeing EOQ Report. Scans the item/detail area. It will select adjusted level details (ASL) if the first six positions of the 216-APPLICATION-SRAN-TASKING are equal to 'TBOEPL'. It selects item records when the item record stock number matches an input stock number found in the file AMC0*GV-L11-INPUT.	Daily
GVL12		EOY SNUD Program. Compares the current dueout price against new SNUD prices. Produces a print of differences by budget code	As Required
GVL13		EOQ Repair Cycle Readout. Selects REPAIR-CYCLE records based upon parameter input, which allows selection by system designator.	Quarterly
GVL14		RAMPS Scan of 901 Records. GVL14 scans the daily transaction history area. It builds a DZE image for interchangeable stock numbers when at least one stock number in a master/interchangeable group has had a transaction.	Daily
GVL15		NF3 to NF1 Authorized InUse Conversion. To format FIC/FEC Inputs to delete Equipment accountability of ERRCD Code NF1 items With Substitute Authorized In Use Details which have an ERRCD Code NF3.	As Required
GVL16		Item Record Readout. Select item records based upon select image which allows selection based upon system designator.	As Required
GVL17		Dollar Value FIA Code Readout. Produces total or when expenditures for FIA codes 330, 331, 440, and directed 441 .	As Required
GVL18		Inventory Analysis Program. Formats data Monthly records for uploading into PC INV program. Formats produced from INV ADJUSTMENT BASIC and ITEM RECORD data.	Monthly
GVL19		FRR Build. Creates FRR images for FSL accounts when TRIC = 'MSI' AND 704-TRANSACTION-PHRASE-CODE = '2I' or '2K' or TRIC = 'TIN' and 704-TRANSACTION-PHRASE-CODE = '2O' or '2M' or '2U' or 'BO' or 'BM' or 'BU' and ERRC = 'XD2' or 'XF3' or 'XD1' or APP-CD = 'XD' or 'XC' or 'XP'	As Required

Number	Notes	Program Title—Purpose	Frequency
GVL20		Price Change Supply Report. Scans CTH area for or when items in new SNUD file, computes expenditures directed over the last year at current price and at new price and gives difference.	As Required
GVL21		FRC SRAN Total. Produces total dollar value of budget code FRC images based upon program logic.	As Required
GVL22		Not assigned	
GVL23		ND Type Stock Number Collector Program. Identifies ND stock numbers that have and don't have a part number.	As Required
GVL24		Use Code "A" Due-out Scan. Identifies in use Monthly details which have a use code of "A." Gives total dueout quantity by memo and firm status.	Monthly
GVL25		Price Change Supply Report based upon CAM DMOS/102 EOY New SNUD Conversion. To accumulate total changes in between last year and the upcoming year based upon demands.	As Required
GVL26		RBL Data/CLS Match. To provide personnel a means to validate Central Level Summary (CLS) data to database before processing RBL images (XCA).	As Required
GVL27		Command ASL Validation. Scans and selects all ASL records where the system designator and the MAJCOM code match those contained in the parameter record, and all option does exist. ASL must be type level A, B, C, D, or E and the directed by code must be C or D.	As Required
GVL28		L08 File Splitter. Divides L08 data into smaller files.	As Required
GVL29		Maintenance Org Program. Data readout on maintenance ORG codes.	As Required
GVL30		RIPDAT (Synergy) Program. Program is used to compute Repair Cycle times using data for the L64 and G081.	Monthly
GVL31		Equipment Mgt Over \$99,999.99. Provides Equipment Mgt With the means to collect data from the SBSS database for the purpose of complying with the Chief Financial Officer's Act.	As Required
GVL32		SRD Extraction Program. Collects 107 SRD records to feed data Into the L30 program.	Monthly

Number	Notes	Program Title—Purpose	Frequency
GVL33		File Status Quarter Counter Program. Program calculates file status For XD2 items that are equal to Blank, A, B, C, and D.	Quarterly
GVL34		RBL File Status Processor. GVL34 reads item records formats LVL inputs and writes them to file AMC0<ALN>*GV-L34-DATA. These images are automatically loaded to Pseudo one, which must be manually started.	As Required
GVL35		Application Code Program. GVL35 scans the item/detail area and selects all master bench stock, IRSP, MRSP, MSK, HPMSK and ASL details with a system designator equal to the system designators entered in parameter input and a SRD equal to one of the AMC used SRDS. It then scans the SRD area and selects records that have a system designator equal to the parameter input and a AMC SRD. Selected records are sorted. Sorted records are then matched by NIIN or ISG. The record with highest number of demands is selected as the record who's SRD will be used to assign the application code. If the item record already has an application code equal to what is going to be assigned no further processing is done. When application codes do not match or the application code is blank, a 1AP is built to load the application code to the item record.	As Required
GVL36		Not assigned	
GVL37		224 selection for A47P Shipment suspense detail selection program.	As Required
GVL38		SBSS D035 compare XE4 match program. Creates XE4 images for unmatched ASLs.	As Required
GVL39		M32 record readout. Reads out selected M32 data in user friendly format.	As Required

Number	Notes	Program Title—Purpose	Frequency
GVL40		FM SORT Program. To sort files using a user friendly menu interface system. Program copies files into a temporary file using standard ECL commands. The program then solicits a response from the requesting user. Based upon the user's input, the program edits all entries. If the entries are okay, then the program sorts the file using the @SORT processor and exits to demand.	As Required
GVL41		AFEMS Quarterly Reconciliation. Formats XJE transactions for AFEMS reconciliation.	As Required
GVL42		ACC Retransmission Program. COBOL & IPF routine developed to retransmit ACC300 program.	As Required
GVL43		Not assigned	
GVL44		Not assigned	
GVL45		Not assigned	
GVL46		L64 File Splitter. Divides L64 output into smaller more manageable files.	As Required
GVL47		RSS version of the command program L07.	As Required
GVL48		RSS version of command program L08.	As Required
GVL49		L13 roll up program (PC program). Combines multiple L13 output files into a single output.	As Required
GVL50		Not assigned	
GVL51		XCB program for FNN SOS. XCB creation program for contractor ICP.	As Required
GVL52		7WS program for FNN SOS. 7WS creation program for contractor ICP.	As Required
GVL53		Not assigned	
GVL54		Not assigned	
GVL55		Not assigned	
GVL56		Daily NSN Scan. GVL56 reads the stock number input file (AMC0*GV-L56-SN) and reads the item detail chain to accumulate the on hand balances. Then scans the daily transaction histories to accumulate transaction data.	Daily

Number	Notes	Program Title—Purpose	Frequency
GVL57		MSD/BMC Price Check. Option 1 will copy MSD/BMC images from the SBSS 729 record area to the MSD79/BMC79 file. Only those MSD/BMC images whose effective date matches the effective date in the GVL57 run option record are selected. Option 2 reads the MSD and the BMC input file. It matches MSD/BMC prices to SBSS prices on the 022 (Cost Record) and 101 (Item Record). When the input MSD/BMC price does match the SBSS record an image of the MSD/BMC is written to the output file MSDOP/BMCOP. An entry is also entered into the error file. Processing totals are provided at the bottom of the error file. The program also identifies MSD/BMC images for stock numbers that are not loaded at the processing ALN SBSS accounts.	As Required
GVL58		DZE For 1UB Transactions. Formats DZE transactions to report WRM data on kit transfers.	As Required
GVL59		Not assigned	
GVL60		AMC SAV program. To select item records based upon select image which allows selection based upon system designator.	As Required
GVL61		Base Level Supply Computer Operations Report (SCOR). A management tool designed to maintain and track computer utilization time.	As Required
GVL62		SCOR MAJCOM version. Headquarters Level SCOR Program merges and computes data collected from the PCL61.	As Required
GVL63		Generic CTH Scan. Provides management with a means to collect data from the CTH area.	As Required

Number	Notes	Program Title—Purpose	Frequency
GVL64		<p>Generic CTH Scan - includes GVL63 Generic CTH Scan. Provides management with a means to collect data from the CTH area. Program supports 5 specific monthly runs:</p> <p>Option 1: Creates parameter for monthly MSI selection for HQ AMC/A47PP.</p> <p>Option 2: Creates parameter for monthly TIN selection for RIPDAT.</p> <p>Option 3: Creates parameter for monthly AE1 selection for HQ AMC/A47PP.</p> <p>Option 4: Creates parameter for monthly RSS data selection.</p> <p>Option 5: Creates parameter for the monthly Warranty Management program.</p>	As Required
GVL65		<p>Generic CTH Scan - GVL64 (base version) Generic CTH Scan. Provides management with a means to collect data from the CTH area.</p>	As Required
GVL66		Not assigned	
GVL67		<p>Generic CTH Scan - for Boeing. The GVL67 scans the CTH area and selects transactions based on internally generated input parameters. The program creates the file AMC0*L67-PC-CTH for importing into Boeing software.</p>	As Required
GVL68		<p>Generic CTH Scan - C17 SMAG report. Generic CTH scan for C17 transactions</p>	As Required
GVL69		<p>C17 Trans Scan by SRD. C17 transaction scan by SRD</p>	As Required
GVL70		<p>Contingency Program. Short and DIFM files for contingencies.</p>	As Required
GVL71		<p>Special CTH scan for FSL & PSP's. CTH scan to collect 1 year's data for each FSL and PSP.</p>	As Required
GVL72		Not assigned	
GVL73		<p>Duplicate Transaction Scan / Correction Program. Program assists analyst in correcting duplicate transaction serial number.</p>	As Required
GVL74		<p>Generic CTH Scan - for Lockheed. Generic CTH scan for RID F81 transactions.</p>	As Required
GVL75		<p>Daily Transaction Scan. Daily transaction read-out (901 records)</p>	As Required

Number	Notes	Program Title—Purpose	Frequency
GVL76		Daily Transaction Scan for SSC inputs. GVL76 scans the TRANSACTION-HISTORY area, selects and counts SSC transactions. The program will then create file AMC0*GV-L76-901 for importing into Access/Excel and a report for printing.	As Required
GVL77		Daily Transaction Scan for repair cycle data. Scans Daily Transaction History area for repair cycle transactions.	As Required
GVL78		CTH Scan For ISU & Stockage Effectiveness. GVL78 scans CTH records, and selects all ISU, MSI and DUO transactions for specific TTPC codes that match the system designators entered into the parameter record. Also, selects the interchangeable data for all stock numbers selected.	As Required
GVL79		Not assigned	
GVL80		AF level version of the L64.	As Required
GVL81		GVL81 CTH Scan. Scans the CTH records, and selects all ISU, MSI and DUO transactions for specific TTPC codes that match the system designators entered into the parameter record. Also, selects the interchangeable data for all stock numbers selected. (Non AMC accounts)	As Required
GVL82	1	FSL Asset Management List. Provides FSS management data to all levels of command and provides transactions data for updating FSS levels and stock number changes.	Daily
GVL83	2	PSP Asset Management Report. Controls and provides status for FSL requisitions and computes EOD FSL to PSP intransit time monthly	Daily
GVL84		Not assigned	

Number	Notes	Program Title—Purpose	Frequency
GVL85		Fill FSL holes from KITS. GVL85 scans the ITEM-DETAIL area and selects due outs, due ins, and kit details based on the org/shop and system designator in the parameter image. DOC's are created for the due-outs and placed in file AMC0*GVL85-DOC. DIT'S are created to delete the due-out document number from the due-in detail. These are placed in file AMC0*GVL85-DIT. For each kit detail with an on hand balance, the FSL serviceable balance is compared to the FSL authorized quantity. If the FSL is short, the ERRCD is 'XD' and does not have positive status; TIN's are created from the kit to fill the FSL shortage. If the FSL is short and the ERRCD is 'XB' or 'XF', the TIN is created regardless of the status. TIN's are in AMC0*GVL85-TIN.	As Required
GVL86		COLT Data Pull. Creates file for input into COLT program which results in 1F3 (ASL load) creation.	As Required
GVL87		SIFS Distribution Collector.	As Required
GVL88		SIFS Distribution Distributor.	As Required
GVL89		COLT Validation. Validates COLT levels ensuring EEX code C is loaded on all NSN's within the ISG Group.	As Required
GVL90		Repair Cycle Visibility Report. Collects repair cycle data for input to the PCL90 Program.	As Required
GVL91		D19 Packer Program D19 Print File Consolidation. Consolidates D19 print file for reporting to HQ AMC/A47W.	As Required
GVL92		Dover L07/L63 Maintenance Run. Program scans item usage to help determine which parts should be repaired first. Inputs to GVL93.	As Required
GVL93		Dover L08 Maintenance Run. Reads files from GVL92 and merges base files together.	As Required
GVL94		WSD Check Conversion Program. Builds 1F3 changes for 216 RCDS with WSD ID check.	As Required
GVL95		Not assigned	
GVL96		AMCRSS Quick Response Team (QRT) Program. Three output files: MICAP due outs, ship status, and estimated delivery dates over 4 days.	Every 2 Hours
GVL97		Not assigned	

Number	Notes	Program Title—Purpose	Frequency
GVL98		Not assigned	
GVL99		Not assigned	

NOTES:

1. This program is run at AMC Forward Supply Locations only and listed in this index for information purposes only.
2. This program is run at AMC PSP's Only.
3. For AMC Headquarters' use only.

JEFFREY W. ACKERSON, Colonel, USAF
Deputy Director of Logistics
