

New AF Form Designer Software (Coming Summer 2018)

Adobe Experience
Manager

As part of the Joint Enterprise Licensing Agreement (JELA) with Adobe, LiveCycle ES4 will be replaced by AEM Forms Designer 6.2. The transition will happen with the deployment of SDC v5.6 this summer.

There will be no change to the way you use or fill-in existing forms using Acrobat DC.

There are only minor changes to how forms are designed and built using AEM Forms, so have your local Form Manager attend the AFDPO Form Designer course if needed. Here's a link to the registration site: <https://cs2.eis.af.mil/sites/12957/default.aspx>
